III. TEXTBOOK AND OTHER MATERIALS:

IV. COURSE DESCRIPTION:

Covers the fundamental concepts of organic structure and reactions of the principal functional groups. Reaction mechanisms. A continuation of Organic Chemistry I focusing on aromatic compounds, aldehydes, ketones, amines, and carboxylic acids and their derivatives. This course will emphasize the synthetic and mechanistic aspects of these compounds and introduce the spectroscopy of organic compounds.

This course is the second of a two-semester sequence in organic chemistry and will continue where the first semester ended. When some selection from the vast body of subject material is considered appropriate, the guiding principle is to choose those topics prerequisite to an understanding of biochemistry and a general understanding of organic chemistry in everyday life.

V. OBJECTIVES:

The overall objective is for the student to master the nomenclature, structure, synthesis, and reactions of the principal classes of organic compounds and to be able to describe organic spectroscopy techniques and interpret the spectra from these techniques. The secondary objectives of this course are to increase the students’ knowledge of the involvement of organic chemistry in everyday life, prepare the students for biochemistry and upper level organic courses, and involve the students in critical thinking exercises through course assignments.

VI. EVALUATION:

The course grade will be determined by the average of quizzes, 4 exam grades and a Final Exam. The final letter grading for the lecture course will be as follows: A ≥ 90%, B = 89-80%, C = 79-70%, D = 69-60%, F = <60%.

Exams:

The Exams will be 100-point exams. The exams will consist of mostly multiple-choice questions and potentially a few free response questions (short answer, essay, mechanism…). The instructor does reserve the right to give exams that are composed of all multiple-choice or all free response questions. The instructor also reserves the right to make different versions of an exam with different questions that cover the same course material and concepts.

The final exam will be worth 150 points and will be a comprehensive exam over Organic II. The final exam will be a two-hour exam and will be multiple-choice.

It is very important that each student show up on time during Exam days. Every effort will be made by the instructor to distribute the exam materials in a timely fashion. Students that arrive to take the exam after the first student has turned in their exam and left the exam room will receive a zero, 0, for the exam. The late arrival to an exam shall be treated as an unexcused absence to an exam and the student shall receive a zero, 0, for the exam grade.

Quizzes:

The quizzes will consist of two or three free response questions from the previous day’s lecture material and be worth five points. The questions on the quizzes will come from the lecture material or lecture “try this” problems. The quizzes will be given during the first five minutes of class. The answer will be discussed in lecture after the quiz, but the quizzes will not be returned to the students. Once the quiz has been graded, the grade for the quiz will be posted on the D2L site.

Reading and Problems:

The reading and practice problems are listed on the website and should be completed before the next class meeting. Failure to stay current on reading and practice problem assignments will greatly affect your ability to keep up during lecture and, therefore, will have an indirect affect on your grade in this course.

Grade Adjustments:

There is no curve in this course. The instructor reserves the right to make linear adjustments to exam grades in cases were an exam question was found to be in error or unreasonably difficult. Linear adjustments will not be made to increase the average on an Exam.

The grade you earn in the course shall be the grade that you receive in the course. There will be no letter grade increases for any circumstance. The instructor will round all averages to two significant figures (69.5 will round to 70 and 69.4 will round to 69) to determine the student's letter grade in the course (70 = C, 69 = D).

VII. GENERAL POLICIES:

Attendance Policy:

Attending every lecture is highly recommended and expected. Attendance will not be taken and will not be used as part of your grade. Not attending class will have an indirect negative effect on your grade. There will not be assigned seating in the lecture, but students are expected to sit next to their study group partners to facilitate communication during problem solving sessions in class.

Class Conduct:
All students are expected to follow proper classroom behavior and treat other students and the instructor with respect. If the instructor deems a student’s actions or behavior disruptive to the class, the student will be asked to leave the class for that day.

Food and Drinks are not allowed in the classroom. Students that find it necessary to eat in class will be asked to leave the class for that day.

Cellular phones must be turned off in class. Ringing/Vibrating phones are disruptive to the class and you will be asked to leave the class if you forget to turn off your phone. If you find it necessary to text in class, you will be asked to leave the class for that day.

Make-up Policy:

Exams

No make-up Exam will be offered. If a student misses an exam for a University-sponsored or legally required activity, the student may use the Final Exam to replace the exam that they missed. Since the Final Exam is comprehensive, it will test the same material that the student had not been evaluated on due to missing the exam.

Examples of the Provost-approved university-sponsored activities are scholarly competitions, fine arts performances, and academic field trips. Examples of legally required activities are emergency military service and jury duty. The instructor also reserves the right to excuse an absence to an exam in cases of immediate medical emergencies and family deaths.

Students who miss an Exam and do not have an excused absence as stated above will receive a zero, 0, for that Exam.

The following are not reasons for an absence to be excused for an Exam: Over sleeping, Transportation difficulties, Scheduled Doctors/Dentist appointments, Arguments with significant others the night before an Exam, Being assigned to work by your employer (nonmilitary) during the Exam, Non-emergency medical concerns, Routine medical care of family or friends, Routine/Emergency veterinary care of pets/livestock, “extenuating circumstances”, Adverse affects of over the counter medications, Over consumption of alcohol, or Lack of sleep the night before an Exam due to studying for the Exam.

Quizzes

No make-up quizzes will be offered. Showing up late for a quiz will decrease the amount of time you have to complete the quiz, but the quiz must be turned in the original five minutes has expired. If a student shows up to class once the time has expired to take the quiz, the student will receive a zero, 0, for the quiz grade.

If a student misses a quiz due to an excused absence, the instructor will calculate the student’s grade without that quiz included. It is the students responsibility to contact the Instructor and provide proper documentation for the absence. Not taking the quiz on time for any reasons other than an excused absence will result in a zero, 0, for that quiz.

Extra-credit:

The Professor does reserve the right to give extra credit. If the Professor chooses to provide extra credit all students will be given an equal opportunity for credit and it will most likely be based on performance in the course. Please take full advantage of your time in and out of class, as well as staying up to date on all reading and problem assignments. Performing well on the assignments and exams will negate the need for extra-credit.

“Survey” Bonus

Students will be given an opportunity to earn 5 bonus points by completing and submitting an online survey. The focus of the survey will be the course components and additional resource (podcasts, Action Center). Student do not have to answer every question, but must click the submit button at the end of the survey to receive credit.

“Scantron” Bonus
It is important that students correct bubble in their name and exam form on the scantron. If **all** students do so correctly, all students will be given **four bonus points** on that exam. The name must be bubbled in with last name first, a space, and, then, first name. The exam form should be written and bubbled in in the Special Codes section of the scantron. The code form will be written on the exam. If any students fill out the form incorrectly, no bonus will be offered.

**Accommodations:**

Any student in this course who has a disability that may prevent him or her from fully demonstrating his or her abilities should contact me personally as soon as possible so we can discuss accommodations necessary to ensure full participation and facilitate your educational opportunities. Students requiring academic accommodation should contact the Office of Disability Services for assistance at (405) 325-3852 or TDD: (405) 325-4173. For more information please see the Office of Disability Services website http://www.sa.ou.edu/ods/index.html.

**Emergency Contact:**

In case of family or medical emergencies, students can leave a message on the instructor’s voice mail (405-325-9011) or by e-mail (mmorvant@ou.edu). Once the emergency has passed, the student is expected to meet with the instructor to confirm the emergency with proper documentation and discuss what material and assignments the student has missed and what steps would be beneficial to aid the student in continued success in the course.

**Optional Instructional Materials and Study Aides:**

Obtaining and use of optional instructional materials and study aides is the sole responsibility of the student. The Instructor will do his best to inform all students of optional instructional materials and possible study aids, but does not assume the responsibility for informing the student's of every possible study aid, making these available to all students, or insuring that the students use optional instructional materials or study aides.

Some of the possible optional instructional materials and study aids that may be available may include, but is not limited to: study guides for the text, solution manuals for the text, alternative texts in the library, old notes from previous semesters, old exams from previous semesters, flash cards, computer software, course summaries/outlines, online resources, UOSA tutors, and knowledgeable family or friends. It should also be noted that courses often changes overtime and materials from a previous semester may be different from the materials and content of the present semester.

**Use of Electronic Devices during Exam:**

Any use of an electronic device (iPod, PDA, Cell Phone, MP3 player, CD player, computer…) during an exam is strictly prohibited. Any use of such a device will be considered an attempt to cheat on the exam and will result in a 0 on the exam although more severe actions may be considered.

Calculators may be allowed on exams when needed, but only for mathematical operations. The use of programmable calculators to store or retrieve information during an exam will be considered an attempt to cheat on the exam. Also, if a calculator is discovered to have saved programs or information that could be used as an unfair advantage on the exam, this will be considered an attempt to cheat on the exam. Programs or operators that aid in mathematical operations such as a quadratic equation calculator may be used.

**Academic Integrity and Honesty:**

All students are expected to conform to college-level standards of ethics, academic integrity, and academic honesty. By enrolling in this course, you agree to be bound by the Academic Misconduct Code published in The University of Oklahoma Student Code (www.ou.edu/studentcode/OUStudentCode.pdf). For further clarification please see: www.ou.edu/provost/integrity-rights/.

All members of the community recognize the necessity of being honest with themselves and with others. Cheating in class, plagiarizing, lying and employing other modes of deceit diminish the integrity of the
educational experience. None of these should be used as a strategy to obtain a false sense of success. The need for honest relations among all members of the community is essential.

Grade Discussions

It is the student’s responsibilities to understand the grading system outlined in this document. By enrolling in this course, the student agrees to the conditions of this grade system. Any discussion of an exam or quiz grade should occur within one week of the exam or quiz. Grades on the exams and quizzes will be final at the end of the semester. It is the instructor’s goal to return all grades to the student by the last week of class. Any errors recording grades on D2L should be brought to the instructor’s attention before the Final Exam. Students are encourage to contact the instructor if they believe that their final letter grade was submitted incorrectly when the error is recognized. Once the Final Exam has been administered, the course is effectively complete and no addition assignments will be offered.

Changes in the Syllabus:

As the course develops, it might be desirable or necessary to make appropriate changes in aspects of this syllabus. I reserve the right to do so.

VIII. QUIZ SCHEDULE

There will be a quiz in every lecture after the first day. If you miss a lecture, you will miss the quiz and receive a zero, 0, for that quiz. Each quiz is worth 0.93% of your grade. Therefore, missing more than ten quizzes will lower your grade by one lecture grade.

IX. EXAM SCHEDULE

Exam 1: Monday, July 13, 7-9 pm, Nielsen 170
Exam 2: Monday, July 20, 7-9 pm, Nielsen 170
Exam 3: Monday, July 27, 7-9 pm, Nielsen 170
Final Exam: Monday, August 3, 8:10-10:10 am, PHSC 201 (Regular Class Time)

X. LECTURE SCHEDULE (Tentative)

The schedule below is a preliminary outline of the semester. It is your responsibility to keep up with changes to this schedule.
